WORK EXPERIENCE

2021 Web Developer (Internship)

YaSchools, Saudi Arabia

In order to graduate, I had to do a three-month internship to complete my Software engineering course. It was enjoyable, and I learnt a lot in a short period of time.

EDUCATION

2022 Bachelor of Computer Science (Hons) (Software Engineering)

City University, Kuala Lumpur

I studied Software Engineering at City University in Malaysia, where I broadened my programming knowledge and developed a solid understanding of how a program should function and perform.

Projects

2021 Fluty Web Application (Final Year Project)

Fluty is a Music Application that runs on the web, you can use voice-commands to perform multiple actions such as play, pause, shift, change volume of the song. I also would like to point out that I worked on this project individually.

Technologies used: HTML/CSS, MUI, ReactJS, NodeJS, ExpressJS, Firebase.

2021 Book Store UI/UX (YaSchools Training Project)

I built a UI/UX for a book store front page as part of my YaSchools training program. I firstly made the design in Figma and then used HTML/CSS, and bootstrap to convert it to a responsive page.

Technologies used: HTML/CSS, Bootstrap, Figma.

2022 CRUD Blog Application

A simple back-end project that I created to hone my backend skills in preparation for future projects.

Technologies used: HTML/CSS, NodeJS, ExpressJS, MongoDB.

HOBBIES AND INTERESTS

I love playing piano in my spare time as it makes me feel relaxing and pleasurable especially when I'm stressed. I occasionally also do video editing in my spare time from time to time as it was one of my favorite pursuits when I was a student.

“

I'm a passionate Software Engineer with a keen eye for design and detail. In my spare time, I enjoy expanding my programming knowledge, creating web applications, and striving to improve in all aspects of the web development field.
